

data.world

SOLUTIONS BRIEF

The Modern Data Catalog for Healthcare

Healthcare organizations are accountable for many core metrics: length of stay, utilization rate, time to service, readmissions, patient experience, and more – each more vital than the last. You must streamline vast amounts of clinical, financial, and operational data; data that comes from all corners of a complex healthcare network. Moreover, you contend with constantly shifting regulations and evolving business models.

That's where data.world comes in.

Industry Overview

Healthcare organizations need:

- Quick access to clinical data
- Privacy around patient data
- Compliance with regulations like HIPAA

data.world solutions can help:

- Streamline and deliver consistent, contextual data
- Govern sensitive health data
- Facilitate the intentional transfer of data from one place to another
- Protect private patient and clinical data

Customers

Healthy data at your fingertips

Imagine having a crystal clear view of all of your data resources in one place: medical records, claims data, administrative data, health surveys, and more. That's what we deliver. From lowering hospital readmission rates to reducing specialist referral waiting periods, find and use data to analyze these metrics. When you need insight into how patient encounters, clinical trials, claims, and payments are connected, that data is already on-hand.

Optimized outcomes

Faster insights mean faster delivery of care. Understand relationships and connections across your data, so you can act faster to improve patient outcomes and experiences.

Improved clinical cycles

Empower your clinical and research teams with data from disparate sources and more powerful analysis. Streamline your clinical data to catalyze better decisions.

Security and compliance

Tag sensitive medical and patient data to keep it protected at all times. Eliminate manual errors while securing PHI and maintaining HIPAA compliance.

Why data.world for healthcare?

Data.world helps healthcare professionals make better decisions with governed discovery of data, reports, and critical metrics. You'll be able to map out the intricate relationships between assets, people, domains, and processes. As a result, you'll have an accurate and complete picture of the entire ecosystem.

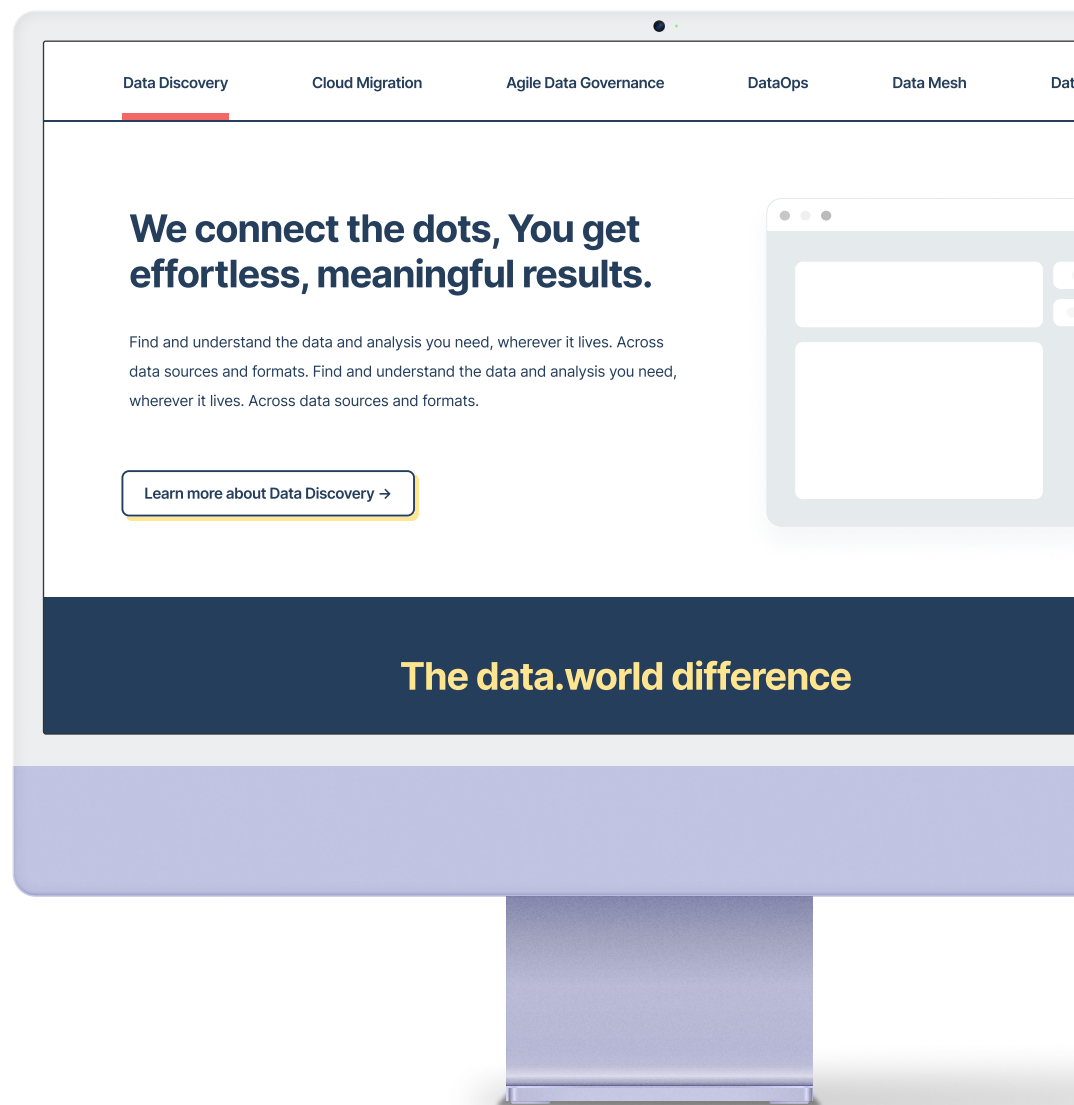

Data.world unlocks new capabilities for healthcare:

Find data 10x faster: Use data.world's chat-like experience for finding data and all of its relevant context. Everyone from data teams to business users can find the information they need to solve problems, 10x faster.

Increase use of trusted data assets: Grow exponentially more efficient with automated monitoring and alerting. Drop crucial updates right where your data users live and breathe: in places like Tableau, Power BI, and Sigma.

Be foundationally ready for AI: When it comes to diagnostics, research, and patient engagement, generative AI is a race. Embrace it and gain a competitive edge. Data.world is designed to give LLMs the rich context needed to generate outputs you can use that are accurate, explainable, and governable.
